

Digilent Design Contest 2010

Cluj-Napoca, Romania

Show off your hardware design skills!

Challenge:

To develop innovative projects using Digilent products. These can be:

- Digital design projects featuring Digilent's FPGA boards, developed in environments such as Xilinx ISE WebPack or ISE Foundation, National Instruments LabView, etc.
- Microcontroller projects featuring Digilent's AVR or PIC-based embedded control boards, developed in environments such as Atmel AVR Studio, Microchip MPLAB, etc.

Key Dates:

- | | |
|---------------------------|--|
| December 1st, 2009 | Registration begins |
| December 8th, 2009 | Contest launch, 18:00
(Room P03, 26 Baritiu St. Cluj-Napoca, Romania) |
| January 20th, 2010 | Registration ends |
| May 15th, 2010 | Final presentations, judging, prizes |

Prizes:

Digilent will be awarding generous prizes. Also, as a courtesy from Digilent, all participants who present their projects in the final contest will get to keep the Digilent hardware they used for their work, even if they do not receive a prize.

Registration Information:

This contest is open to all university students. Projects can be entered by individuals or students working in pairs. To register you will need to submit the registration document along with a general specification document for your proposed project. To register or receive more information:
